Osaka Prefecture decides to use Vision's mobile Wi-Fi routers to build an online education framework

Vision Inc. (headquartered in Shinjuku-ku, Tokyo; Kenichi Sano, President and CEO; hereafter "Vision"), a provider of the Global WiFi business and the Information and Communications Service business for corporate clients, hereby announces that Osaka Prefecture has decided to use its mobile Wi-Fi routers to build a framework for online education in preparation for a second or third wave of COVID-19.

Osaka Prefecture announced that in preparation for a second or third wave of COVID-19, it has decided to develop an online education framework for its prefectural high schools and other public schools by the end of June 2020.

Vision has a track record of providing mobile Wi-Fi routers to universities and vocational schools. To support as many students as possible in online learning, the company has decided to provide rental mobile Wi-Fi routers to families without internet access as part of Osaka Prefecture's initiative to develop an online education framework for its prefectural high schools and other public schools in response to COVID-19. In doing so, Vision hopes to contribute to the spread of online education.

Further, the government included in its emergency economic measures in response to COVID-19 the early implementation of GIGA School Concept. In this regard, it announced plans to accelerate the implementation of such initiatives as "one device per student" and setting up telecommunications networks necessary for online learning at home*.

Vision has a track record of collaborating with regional municipalities to address the inbound tourism-related issue of providing internet access to foreign tourists. In specific, Vision has provided its rental mobile Wi-Fi routers to foreign tourists visiting Japan.

Going forward, through tackling various social issues, Vision intends to contribute to the development of a sustainable society and to the global information and communications revolution.
